Education

Indian Institute of Information Technology
Bachelor of Technology in Information Technology *2018 – 2022*

Experience

Software Engineer (Full Stack Developer) August 2022 – Present
Tata Consultancy Services *Pune*

Boss Modernisation

- Designed and Developed the **Proof of Concept (POC)** from scratch for Metlife BOSS legacy app using **React JS** and **Material UI** showcasing enhanced user experience post-migration.
- Built new layout for case management optimising the loading process by **25%** and made it responsive.
- Integrated the new **REST APIs** using **Axios** to handle case data.
- Collaborated with stakeholders and cross-functional teams to gather requirements, align migration goals, and deliver a comprehensive PoC within tight deadlines.

ERS Tool

- Developed the new workflow management system of ERS tool to optimise the segregation process , which reduced the manual effort by **33%** using **JavaScript , Jquery** on Microsoft Sharepoint.
- Re-designed the Email code structure to handle multiple users for enhanced customer process.
- Developed more then **10+** process within a workflow to ease customer transition in finding the correct Process ITOs and generating Project invoices.

Cyplus (GasPower System Management Tool)

- Single-handedly managed to redesign the Cyplus Gaspower process workflow structure to reduce manual process of selecting projects based on regions using **PrimeReact**.
- Developed the new project management Dashboard and implmented the search functionality and process interdependency within the Cyplus application.

Software Engineer January 2022 – June 2022
Cognam Technologies private limited *remote*

- Contributed to the development of a cross-platform super app by migrating legacy code to **React.js** with **Cordova**, improving maintainability and scalability.
- Leveraged **REST APIs**, **Postman** ,**Redux** to manage data storage in a containerized environment, ensuring efficient and secure data handling.

Full Stack Developer March 2021 – July 2021
MyDos Technologies (Freelance) *remote*

- Developed **RESTful APIs** on **AWS Cloud**, implementing a **serverless architecture** using **AWS API Gateway**, **Lambda functions**,**DynamoDB** using **Node js**.
- Integrated AWS services including **Cognito**, **SNS**, **SQS**, and others to enhance scalability, security, and messaging workflows.

Skills

Languages : JavaScript , TypeScript , C/C++

Technologies : React JS , Node JS, Redux , MongoDB , Express JS , AWS , GIT ,HTML ,Css

Dev Tools : Visual Studio Code, Postman
